

Volume 11 Author and Subject Index

- Age/grade level, 33
 Analysis of asymmetric binary proximities, 397
Andersen, E. B., 219
 Angoff Design V method, 143
Angoff, W. H., 33, 291
 Appropriateness measurement, 59
 Appropriateness of test scores, 355
 Aptitude measurement, 175
 Asymmetric binary data, 397
 Attitude measurement, 107
 Auxiliary examinee information, 81
- Background data, 1
Baker, F. B., 111
 Bayesian item parameter estimation, 111
 Between-*t* statistic, 47
 Bias, 161
 Biodata, 1
Birenbaum, M., 385
 Book reviews, 104, 107, 219, 325, 429
Brennan, R. L., 221, 263, 279, 301
- Canonical correlation, 317
 Circular equating paradigm, 301
 Classification, 1
 Classification algorithms, 329
 Cluster analysis, 329
 Clustering methods, 329
 Clustering validation, 329
 Cognitive component analysis, 175
 Cognitive diagnosis, 385
 Comparability, 33
 Component latent trait models, 175
 Computer Program Exchange, 58, 160, 174, 433
 Conditional maximum likelihood estimation, 111
 Confidence intervals, 93
 Confidence region, 174
 Congeneric models, 279
Cook, L. L., 225
Cooper, M. C., 329
Cope, R. T., 143
 Correction for restriction of range, 211
 Cronbach's coefficient alpha, 93
 Cross-validation, 195
 Cross-validation squared multiple correlation, 433
 Cutting scores, 279
- DeSarbo, W. S.*, 397
 Diagnostic testing, 385
- Dichotomous data, 307
 Dimensions of emotion, 397
 Dissimilarity data, 160
Dodd, B. G., 371
Dunn, J. C., 429
Drasgow, F., 59, 161
- EM algorithm, 81
Embretson, S. E., 175, 219
 Equating, 143, 221, 225, 245, 263, 279, 291, 301
 Equating errors, 279
 Equating, practical issues, 279, 291
 Equipercile equating, 151, 245, 279
 Equipercile equating and smoothing, 225, 291
 Error analysis, 385
 Estimation of item parameters, 81
- Factor analysis, 58
Fairbank, B. A., Jr., 245
Feldt, L. S., 93
Fleischman, L. E., 211
Fowler, R. L., 419
- General Euclidean model, 429
 Generalized logistic item response model, 355
 Grade level, 33
Gross, A. L., 211
 Guessing, 47
Gupta, S., 397
- Hamer, R. M.*, 429
Harris, D. J., 151
Hattie, J. A., 47
Havlena, W. J., 397
Hays, R. D., 58
Hedges, L. V., 104
 Hierarchical clustering, 329
Holbrook, M. B., 397
Hoover, H. D., 151
- Inappropriate test scores, 59
 Inconsistent maximum likelihood estimates, 161
 Individual tests, 33
 Information, item, 371
 Information, test, 371
 Intelligence tests, 195
 IRT and conventional equating methods, 225
 IRT equating, 151
 Item bias, 161

- Item characteristic curves, 111
- Item difficulty, 175
- Item fit statistics, 47
- Item information functions, 371
- Item parameter estimation, 81, 111
- Item response theory, 59
- Item response theory, item bias, 161
- Item response theory, item parameter estimation, 81, 111
- Item step values, 371
- Item validity, 1

- JOHN-NEY, 174
- Johnson-Neyman technique, 174
- Joint maximum likelihood estimation, 111

- Koch, W. R., 371
- Kolen, M. J., 263, 279, 301
- Kroonenberg, P. M., 195

- Latent trait models
 - component, 175
 - linear logistic, 175
- Latent trait theory, 151
- Lautenschlager, G. J., 174, 433
- Lee, S.-Y., 317
- Lehmann, D. R., 397
- Less than optimal circumstances for equating, 225
- Levine equating, 263, 291
- Levine linear equating method, 143
- Levine, M. V., 59
- Lewandowsky, S., 429
- Life history, 1
- Linear equating, 143, 263, 279
- Linear logistic latent trait models, 175
- Linear regression, 211
- Linn, R. L., 355
- Log odds ratio, 307
- LOGIST, 161
- Logistic item response model, generalized, 355
- Lord's chi-square, 161
- Lumsden, J., 109

- Marginal maximum likelihood, 81, 111
- Maximum likelihood estimation, 81, 111, 161, 317
- McLaughlin, M. E., 59, 161
- Mean-square residual statistic, 47
- Measurement, 1
- Meta-analysis, 104
- Methodology review, 1, 111, 329
- Milligan, G. W., 329
- Mislevy, R. J., 81
- Missing data, 211
- Mueller, D. J., 107
- Multidimensional scaling, 160, 397, 429
- Multidimensionality, 47
- Multiple correlation, 317
- Multiple-choice items, 385
- Multivariate statistics, 325
- Mumford, M. D., 1

- Nearest neighbor analysis, 160
- Negative hypergeometric, 245
- Neyman-Pearson Lemma, 59
- Nonequivalent populations, 263
- Nonlinear regression, 211
- Nonsignificant prediction differences, 174
- Norms, 33
- Number of factors, 58

- Olkin, I., 104
- One-parameter item response model (see also Rasch model), 47
- Open-ended items, 385
- Optimal appropriateness indices, 59
- Ordination procedures, 329
- Ostrom, T. M., 107
- Owens, W. A., 1

- Paragraph comprehension, 175
- PARALLEL, 58
- Parallel analysis, 58
- Partial credit model, 371
- Partitioned maximum likelihood, 317
- Partitioning methods, 329
- Perfect congruence analysis, 195
- Person discrimination, 355
- Person fit statistics, 47
- Person response curve, 355
- Person response model, 355
- Petersen, N. S., 225
- Pfeiffer, R. A., 325
- Polychoric correlation, 317
- Polychotomously scored items, 371
- Polyserial correlation, 317
- Poon, W.-Y., 317
- Population invariance and sample selection, 225
- Population squared multiple correlation, 433
- Postsmoothing, 245, 291
- Presmoothing, 245, 291
- Product-moment correlation, 419
- Properties of anchor test items, 225
- Proximity data, 160
- Pruzek, R. M., 325

- Rank order correlation, 419
- Rasch model, 111, 151
- Regression, nonlinear, 211
- Reliability, 1, 93
- Reliability, test-retest, 307
- Research synthesis, 104
- Response format, 385

Restriction of range, 211
Robertson, G. J., 33
 Robustness of statistics, 419
Rodgers, J. L., 160
Rogers, H. J., 47
 Rule space, 385

Salih, F. A., 93
 Selection, 1
 Sets of correlation matrices, 195
 SHRINKR, 433
 Smoothing, 245
 Special Series, 221
Sprott, D. A., 307
 Standard errors, 245
 Standardization, 33
 Statistical distributions, 419
 Statistical inference, 93
 Statistical methods, 104, 325
 Statistical power, 419
 Statistical tests, 93
Stevens, J., 325
Stock, W., 104
Strandmark, N. L., 355
 Synthetic population weights, 301

Tatsuoka, K. K., 385
ten Berge, J. M. F., 195

Test design, 175, 219
 Test information functions, 371
 Test reliability, 307
 Test score inappropriateness, 355
 Test-retest reliability, 307
Thompson, T. D., 160
 Three-mode principal components analysis, 195
 Three-parameter logistic model, 111
 Three-way MDS, 397
 Three-way unfolding analysis, 397
 Threshold MDS model for binary data, 397
 Total-*t* statistic, 47
 TRIAGE, 160
 Tucker equating, 263, 291
 Tucker linear equating method, 143
 Two-parameter logistic model, 111

 Vertical equating, 151
Vogel-Sprott, M. D., 307

 Wechsler Intelligence Scale for Children—Revised, 195
Wetzel, C. D., 175
Whitely, S. E., see *Embretson, S. E.*
Woodruff, D. J., 93

Young, F. W., 429

 ZXMIN, 355
